PROFESSIONAL SUMMARY

Full-Stack developer specialized in creating fast, scalable, and modern web applications. I focus on understanding business needs and translating them into efficient technical solutions.

FOCUS AREAS

FULL STACK

AUTOMATION

AI

ARCHITECTURE

TECHNICAL SKILLS

FRONTEND

React
Next.js
Angular
TypeScript
JavaScript
Redux
Tailwind CSS

BACKEND

Node.js
Express
Spring Boot
Python
PostgreSQL
MongoDB

TOOLS & PLATFORMS

Docker
AWS
Git
n8n
Vite
Figma

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER

May 2025 - Present

FREELANCER

As a freelance developer, I work directly with clients to create custom web solutions. I specialize in modern application development with React, Next.js, and cloud technologies, offering everything from landing pages to complex business management systems.

Building complete web applications using Next.js, React, and TypeScript. Implementation of modern, responsive interfaces with smooth animations and optimized user experience.

Integration with third-party APIs, payment systems, and cloud services. Backend development with Node.js and PostgreSQL/MongoDB databases.

Implementation of automation solutions using OpenAI APIs and generative AI tools to optimize clients' business processes.

Advising clients on scalable architectures, development best practices, and digitalization strategies for their businesses.

Technologies — React — Next.js — TypeScript — Node.js — PostgreSQL — MongoDB — Tailwind CSS — Framer Motion — OpenAI API — Vercel — Stripe

SOFTWARE DEVELOPER

November 2024 - April 2025

EVIDEN

At Eviden (formerly Atos Digital), I worked on digital transformation projects for large enterprises. I focused on developing cloud-native solutions and modernizing legacy systems using microservices-based architectures.

Development of serverless applications using AWS Lambda, API Gateway, and DynamoDB. Implementation of CI/CD pipelines with AWS CodePipeline and automated deployments.

Migration of monolithic applications to microservices architectures, improving scalability and maintainability of enterprise systems.

Development of RESTful and GraphQL APIs for integration between internal and external systems. Implementation of messaging patterns with AWS SQS and SNS.

Creation of detailed technical documentation and implementation guides to ensure knowledge transfer and long-term maintenance.

Technologies — AWS Lambda — AWS API Gateway — DynamoDB — AWS SQS — AWS SNS — AWS CodePipeline — Python — Node.js — GraphQL — Docker — Terraform

FULL STACK DEVELOPER

March 2024 - May 2024

ATOS CONSULTING

At Atos Consulting, I participated in technology consulting projects for the public sector. I developed scalable web solutions using modern technologies and agile methodologies, collaborating with multidisciplinary teams.

Implementation of user interfaces with React and Vue.js, following accessible and responsive design principles. Utilization of corporate design systems.

Creation of backend services with Java Spring Boot and Node.js. Design and implementation of relational databases with PostgreSQL.

Active participation in Scrum ceremonies, including sprint planning, daily standups, and retrospectives. Close collaboration with Product Owners.

Code management with Git and GitLab, implementing GitFlow workflows and code reviews to maintain software quality.

Technologies — React — Vue.js — Java — Spring Boot — Node.js — PostgreSQL — Git — GitLab — Jira — Confluence — Docker

— SELECTED PROJECTS

LLM ROUTER

Apr 2026

Full Stack Developer

Smart LLM router that selects the best model per request and explains every decision. Full-stack platform with scoring engine, fallback system, and OpenRouter catalog sync.

Heuristic scoring engine with quality, latency, and cost components

Multi-provider fallback system for operational continuity

Living model catalog synced with OpenRouter API

Technologies — Astro 6 — React 19 — TypeScript — Tailwind CSS — Framer Motion — Python — FastAPI — SQLAlchemy — PostgreSQL — Docker — OpenRouter

NEXA OS

May 2026

Full Stack Developer

Local AI desktop assistant for Windows — voice-controlled, privacy-first. Tauri + React + Python stack with local STT/LLM/TTS pipeline.

Local STT with faster-whisper for offline speech recognition

Multi-provider LLM support via Ollama and LM Studio

Tauri v2 system layer with global hotkey and overlay window

Technologies — Tauri — React 19 — TypeScript — Tailwind CSS — Python — FastAPI — Rust — SQLite — WebSocket — Ollama

KNOWDEX

Mar 2026

Full Stack Developer

Developer knowledge base that helps you store, search, and reuse technical knowledge with AI. Semantic search, snippet management, and agent-based workflows.

AI-powered knowledge processing and semantic search

Snippet and documentation management system

Agent-based workflows for automation and insights

Technologies — Next.js — React — TypeScript — Node.js — PostgreSQL — WebSockets — AI — Tailwind CSS

GUANTANAMERA CORE

Jan 2026

Full Stack Developer

Comprehensive management system for Bar Guantanamera with real-time orders, inventory control, establishment configuration and sales analytics.

Administrative Dashboard with Kanban view and kitchen system

Real-time notifications with Server-Sent Events (SSE)

Complete menu management: categories, products, prices and availability

Technologies — Node.js — Express — Prisma ORM — PostgreSQL — Next.js 14 — Tailwind CSS — Framer Motion — Docker — Swagger/OpenAPI

— EDUCATION & CERTIFICATIONS

Web Application Development — I.E.S Las Galletas, 2024 (Honors)

Meta Front-End Developer — Meta, Oct 2024

Full Stack Development — Udemy, Dec 2025
